# Acknowledgements

---

We would like to thank our project supervisor, **Mr. Imran Saleem**, his assistance and understanding of our situation that enabled us to complete the report.

We would also give a special word of thanks to **Mr. Khurram Khan**, for their help and encouragement over the last three month. Both of them instructed us to carry the work flow in right direction and time to achieve the best result in limited time. We are extremely grateful and remain obliged both of them.

We wish to thank our families and friends for their support and prayers over the years.

And finally you, whoever you are, for taking the time to read this report.

## **Abstract**

---

The project entitled “Child Tracker” is an application that allows parents to monitor their child's cell phone. All incoming calls, SMS text message, location and speed. Messages can be seen and interrupted by the parents, who can also monitor where their children are (through GPS). Our aim is to develop an efficient and improved geographical asset tracking solution and conserve valuable mobile resources by dynamically adapting the tracking scheme by means of context aware personalized route learning techniques. This system uses Android based mobile phones for the software to be run.
