## **Acknowledgment**

We want to acknowledge and thank Miss.Arifah Azhar and Miss.Hafsa Zafar for their hard work and support in our project. They have given countless number of hours during the whole project in reviewing all the technical obstacles and guiding us towards the solution. They have been our motivation in overcoming all the difficulties we faced during development of this project.

## **Abstract**

Rentowe.com is a website which helps people to rent things online easily. People who want their things to be rented post the ad about the thing and interested people who want to rent contact the respective person and make deal. This a very cheap and door step business with less amount of time consumption.

## 1.1 Project Overview

Nowadays technology has grown up so fast that the world has become a social hub. Everyone knows what's happening around the globe. No one can deny the tremendous achievement in the field of technology in fact in every field of the world. Similarly people using internet are all around the world. Life has become so fast that almost every person is doing his/her daily routine task online. Online system has provided many benefits to people. Our online renting system is also something like that. Nowadays renting system is emerging among people. They rent something which they need for time being and after their required task is achieved they give that thing back to the owner.

Online renting system is a platform where people post ad online and rent things. Concerned people see ads and deal with the respective person. It is a feasible choice for the people who want to rent things online.
