ACKNOWLEDGEMENT:-

We would like to thank our project supervisor, **Mr. Imran Saleem**, his assistance and understanding of our situation that enabled us to complete the report.

We would also give a special word of thanks to **Mr.Imran Saleem**, for their help and encouragement over the last four month. Both of them instructed us to carry the work flow in right direction and time to achieve the best result in limited time. We are extremely grateful and remain obliged both of them.

We wish to thank our families and friends for their support and prayers over the years.And finally you, whoever you are, for taking the time to read this report.

DEFINITION OF TERMS, ACRONYMS AND ABBREVIATIONS:-

This section should provide the definitions of all terms, acronyms, and abbreviations required to interpret the terms used in the document properly.

Term	Description
AP	Access Point
API	Application Programming Interface
Customer	Diabetics Patient
DFD	Data Flow Diagram
GPS	Global positioning system
GSM	Global System for Mobile Communications
GUI	Graph User Interface
UC	Use Case
XML	Extensible Mark-up Language
M-Health	Mobile Health
Db-Patient	Diabetics Patient

ABSTRACT:-

In trendy health care society we have a tendency to be presenting associate degree innovative plan within the world of health care services within the variety of present M-Health golem application. The key feature of this application is to supply important data below one roof. This software package covers the divergence between all the interconnected services in a very health care center i.e. the interconnection between doctors, and patient,. The most aim of this application is to supply an easy interface in stress driven scenario. This application provides remote access to medical records, doctor's prescription, and patient's information. In the main this application focuses a health atmosphere for the input data sharing exploitation moveable golem devices. So as to supply security and authentication varied prospective ways like skilled authentications (user authentication) in between doctor– diabetics patient, are used. The most objective of

This application is to diminish the gap between doctor and patient.
