Program Head

Abstract

Public opinion has always been a major factor behind the wellbeing of human society; this gives a foresight of public needs, wishes and requirements. Developed countries give a lot of importance to their public's opinion. Which in return help them understand their public views, perceptions and feedbacks on different issues either they can be social, political, religious and what not. One of the most important building blocks of this social media is online Polling surveys conducted by the various organizations, universities, research institutions to get the opinion of the people all around the world. The results of these polling surveys help governments, human development organizations, NGOS's, research institutions to know what people think, what their opinion is , what their demands and needs are and how they want their needed to be fulfilled. In result they do their best to fulfill their public's requirements and wishes. This online customizable polling application is meant to provide the online poll creation and voting facility. In this application a user can create the poll via GUI and can direct other people to its poll via an online link. The user can vote on others poll as well. The poll results are visible in form of attractive and easy to understand user interface. Overall this application provides an online free of cost application to create, vote and view polls
