## ACKNOWLEDGEMENT

All praise to Almighty Allah, the most merciful and compassionate, who enabled me to complete this thesis.

With deep gratitude I would like to thank my supervisor, “Dr. Tehmina Saqib “for her patience, continuous encouragement, excellent research skills and steady guidance which has helped me to complete this work on timely manner. Her support enabled me to overcome setbacks and stay focused.

I would like to thank all my teachers who have been a source of inspiration to me throughout my academic year.

Most importantly, none of this would have been possible without the love and patience of my parents who have been a constant source of love, concern, support and strength all these years. My parents continued to be both proud and supportive of my work during the time of uncertainties, challenges, and sacrifices needed to complete this thesis.

To my only lovely mother, who has inspired me in life to the road of learning, whose presence has motivated me a lot to stay focused and determined and who was with me throughout this process.

I am especially thankful for all the teachers and students who fully cooperated with me and participated in my study whole heartedly.

And also I would like to give tribute to our beloved land *Pakistan*, as she gave me courage enough to live independent with pride. And psychologically make me capable to compete with the people of other nations.

Fatima Qureshi

## **Abstract**

The focus of the study is to investigate aggressive fantasies among adolescents. Two groups of adolescents were taken with their age range 18 to 23 years. It was hypothesized that boys will have show more aggressive fantasies than girls. The data was collected through 7 items aggressive fantasies scale, which was developed by (Huesman&Eron, 1986). A total of 100 adolescents were taken, half of them were boys and half of them were girls, all belonging to University of Management and Technology Lahore, Pakistan. The results showed that there is a slight difference of aggressive fantasies in boys as compared to girls as boys have more aggressive fantasies than girls, overall age difference with reference to aggressive fantasies among girls and boys were not found.

**Key words:** Aggressive Fantasies, Adolescents, Violence, Pakistan
