Session

2013-2017

University of Management and Technology

C-II Johar Town Lahore Pakistan

DEDICATION

We dedicate this project to our beloved parents who make great efforts to help us standing in this position, along with our beloved teachers who made full cooperation with us in development of this project.

We must acknowledge as well the many friends, colleagues, students, teachers, archivists, and other librarians who assisted, advised, and supported us in our project and writing efforts over the years. They have consistently helped us to keep perspective on what is important in life and shown us how to deal with reality. None of this would have been possible without all of them. They always told us to keep it going forward until we reach our destination.

The members of our Final Year Project committee, Sajid Mahmood, Dr. Adnan Abid, Dr. Shahid Awan, Dr. Adnan Shehzada, Dr. Tahir Ejaz, Malik Tahir Hassan, Dr. Masroor and Dr. Tayyaba Anees have generously given their time and expertise to better our work. I thank them for their contribution and their good-natured support.

We are grateful to many persons who shared their memories and experiences during this whole program and teaches us a lot things which will surely help us in the near future and surely in our professional life.

The program was one of the most important and formative experiences in our life. We are grateful as well to our Institute (University of Management and Technology) that made it all possible for us to complete our degree and provide us a beautiful and informative environment to learn a lot of things that made us a good and a knowledgeable person that we are today.

ACKNOWLEDGMENT

It is a great pleasure, a privilege, an honor, a source of much personal satisfaction, to be here at UMT. We have not done this work alone. Many people have helped to keep our project alive in many ways that will be unable to explain.

We consider our self the lucky person's as being the child's of such an affectionate parents and student of such a kind and dedicated teachers.

First and the foremost, we wish to express our deepest gratitude to our project supervisor Rao Faizan Ali for the continuous support in our BS studies and in final year project, for his patience, motivation, enthusiasm and immense knowledge. We are incalculably grateful.

His guidance helped us all the time in the final year project and the writing of this thesis. Without his this project would not have been completed.

Besides Our project supervisor we would like to thank some other teachers including Tayyaba Anjum for her encouragement and insightful comments related to our studies and project. We also would like to pay the gratitude to Dr. Adnan Abid, Dr. Malik Tahir Hassan, Tayyaba Anees, Sajid Mahmood and Dr. Shahid Awan for their kind and motivational words and actions which encourages us to work on this project and complete it.

The members of committee who honored us on our research and the development we did on our project. All the words and the things they told us really means a lot to us, to be a powerful incentive to carry forward our projects and to continue our work with renewed energy, to strive for ever more fruitful and interesting discoveries and achievements will be with us to the rest of our life's.

We also would like to thank all the respected teachers of computer science department for their guidance in every way they guide us and make us worthy to complete this thesis.

Project Title

“Super Cars & Bikes Advertisement”

Objective

The main objective of this project is to provide a safe and trust worthy classified platform for super cars and bikeslover.

ABSTRACT

Project principle thought is to take care of the issue of individuals who need to purchase or deal new/second hand Super Car and Super Bikes.

The main objective of this project is to provide Vehicle enthusiast a safe and trust worthy platform which purely dealing with super Vehicles.

This site likewise giving Nearby Mechanics highlight to the Buyer and merchant, in a case that if anything goes wrong with the vehicle he/she can search the nearest mechanics to his/her location and get that Vehicle fixed as soon as possible.

This site is a safe way of purchasing Cars and Bikes in light of the fact that exclusive those Cars and Bikes will be posted on the site which are confirmed from Excise, if the buyer has any doubt regarding the vehicle he/she is about to purchase from our website than he/she can easily get the vehicle details from the excise before buying it.

The user registered on our portal can create events of his/her own and the other user can attend them if they are interested in them. It is providing all the passionate super Vehicle enthusiast on a single platform to gather at one place and enjoy.

This web portal is also targeting the economy class as well in which the person can post the car ad if he wishes to. The portal is also the platform of modified Vehicles. The seller can post the ad of the modified Vehicle on our portal.

As they need to go to the merchants, showrooms, markets for this reason and need to invest additional energy, now they would not need to.

With the assistance of this site individuals settling down anyplace would have the capacity to spare time and can without much of a stretch deal or buy their vehicle(s) by posting the promotion on this site alongside their contact data, so purchaser and dealer can make the arrangement by reaching with each other.

If anyone new or old car enthusiast want to buy a vehicle he will find so much difficulty in searching and purchasing of any super car or vehicle because if he find any vehicle it will hard to find parts or mechanics. So this Project will provide him a perfect and complete platform for sale, purchase, events, parts, and other activities regarding to super cars and super bikes. As currently there is no website or app which is dealing purely with these super bikes and super cars.

DEFINITIONS & ACRONYMS

UMT:

The Acronym stands for our institute, University of Management and Technology.

WWW:

The Acronym stands for World Wide Web. It is a network of Online content that is formatted in HTML and accessed via HTTP.

PHP:

The acronym stands for Personal Home Page. It is general scripting language mostly borrowed from other languages like C.

SQL:

The Acronym stands for Structured Query Language. It standardized query language for requesting information from a database.

JS:

The Acronym stands for Java Script. It is primarily used on the Web. It is used to enhance HTML pages and is commonly found embedded in HTML code.

JQ:

The Acronym stands for Java Query. It is a platform-independent object-oriented query language defined as part of the Java Persistence.

HTML:

The Acronym stands for Hypertext Markup Language. It is a standardized system for tagging text files to achieve font, color, graphic, and hyperlink effects on World Wide Web pages.

CSS:

The Acronym stands for Cascading Style Sheets. It is a style sheet language used for describing the presentation of a document written in a markup language.

1. INTRODUCTION

This project is to provide Vehicle enthusiast a safe and trust worthy platform which purely dealing with super Vehicles This project is to bring the Super cars and Bikes enthusiast on a platform where the passionate people benefit from the internet. The platform will provide or acts as an interface between Individuals of super cars and super bikes. Here the user will not have to go to the dealers in selling and purchasing the Vehicles. The user just puts an ad of the Vehicle on our platform for the advertisement of his or her Vehicle and let the portal do the rest for him or her. The other user will see the ads and can contact the seller if they are interested in his or her Vehicle.
