Chapter # 3: Implementation of Code

Scroll the page.....	30
Send request to server	31
All cancel buttons.....	32
All edit buttons.....	33

Send chat messages	34
Send chat messages	35
Send message on enter press.....	36
Connect to database	37
Get content from editor.....	38
Check page has any task.....	39
Check any student is added.....	40
Select all pages in list.....	41
Remove all pages in list.....	42
Get questions html.....	43
Calculate human timings	44
Send push notifications.....	45
Write compressed images to folder	46
Compress images	47
Notification Received.....	48
Notification Received.....	49
Upload analytics to google analytics.....	50
Upload analytics to google analytics.....	51
Upload image to local database.....	52
Upload image to local database.....	53
Read data from local database	54
Timer in test	55
Get active page of book	56
Register device to server.....	57
Turn pages.....	58
Calculate z-index of page being dragged	59
Device back button event	60
Zoom specific coordinates on double tap.....	61
Zoom specific coordinates on double tap.....	62
Automatic configuration for all platforms	63

Chapter # 4: Test Cases

Login	64
Add Student.....	65
Add Parent.....	66
Add Teacher.....	67
Add Book	68
Add Part.....	69
Add Chapter.....	70
Add Section.....	71
Add Page.....	72
Assign Task.....	73
Create Test.....	74
Give Remarks.....	75
Start Chat.....	76
Chapter # 5: User Manual	77
Chapter # 6: Conclusion.....	111

Abstract:

E-School Management System is a comprehensive web and mobile based School Management Software. It is designed for better interaction between students, teachers, parents & management. It also eliminates the need for student to carry their school books along with them, as books will be available in electronic form.

The software being web and mobile-based can be accessed from anywhere in the world, which enables the students, teachers, parents & the management be in touch with each other at all times. The parents of students are very busy now days, this school management system helps the parents monitor their children from anywhere. They can check their children's academic performance from a remote location.

Some Students are not bright, this school management system helps teacher to overcome this problem by assigning them home tasks or quizzes.
