

**Fabrication of continuous mode
biomass gasifier reactor for thermal application**

Submitted to

UNIVERSITY of MANAGEMENT *and* TECHNOLOGY, LAHORE

In partial fulfillment of the requirements for the degree

Of

Bachelors of Science in Industrial Engineering

Session (2013-2017)

DEPARTMENT OF INDUSTRIAL ENGINEERING

SCHOOL OF ENGINEERING

UNIVERSITY OF MANAGEMENT AND TECHNOLOGY, LAHORE

CERTIFICATE

It is to certify that this project report entitled, “**FABICATION OF CONTINUOUS MODE BIOMASS GASIFIER REACTOR FOR THERMAL APPLICATION**” is based upon the results of experiments carried out by **ALEEZA FATIMA, MUHAMMAD AZEEM ASHRAF** and **OMER MUNIR** under my supervision. No material has been used in this report which is not their own work except where due acknowledgement has been made. They have fulfilled all the requirements and qualified to submit this report for the Degree of BS-Industrial Engineering.

ADNAN AHMAD NAEEM

Assistant Professor/ Supervisor

Department of Industrial Engineering

Acknowledgment

We would first like to thank **Almighty Allah** for empowering us to complete this project on time.

We would like to thank our Project advisor, Sir **Adnan Ahmad Naeem** who gave endless support and dedication towards the project and giving us all of his time to complete this project and its presentation on time. Without you, we would never be able to even start the project. We are grateful and gratefully acknowledged your contribution.

We would also like to acknowledge the support of following peoples:

- We would like to acknowledge the support of our friends and relatives for supporting us in every manner.
- We would like to thank and appreciate the SEN faculty for sharing their knowledge with us. It helped us to understand how to fill the gaps of our project.

We thank you all.

ALEEZA FATIMA

MUHAMMAD AZEEM ASHRAF

OMER MUNIR

Abstract

As we were doing our final year project, our main objective is to convert agricultural-waste into a useful resource. We selected a preliminary design of continuous mode. We designed that model of gasifier on Solid Works designing software. Then we fabricate a Continuous mode Biomass Gasifier Reactor with improved thermal performance and low cost, by using local material and technology. It provide clean Fuel for thermal applications and economical energy solution for industrial and domestic purposes. The gas produced in gasifier could be used to generate electricity and also for continuous supply of gas for commercial purposes. Due to load shedding of natural gas industries have to suffer a big loss. We have used rice husk as biomass and made a special reactor fabricated from local machines and local materials in order to decrease the cost of gasifier. We have achieved high thermal efficiency from our reactor using gasification process which requires limited amount of air that has been provided by a DC fan. During experimentation phase we were facing difficulty in the process of gasification so we figure out the cause which is directly associated with the supply of air so we fabricate a tunnel for supply of sufficient air. By-product is a bio-char which can be used as a fertilizer because of enrichment of essential minerals like potassium and nitrogen and also be used for water filtration process.

PROJECT ACHIEVEMENTS

We participate in various competition and present our project at different national level competitions.

➤ 6th Invention to Innovation Summit'17

We have participated in 6th Invention to Innovation Summit'17 organized by Punjab University Lahore and from there we won **“Technology and Innovation Award”**.

➤ **SATHA (South Asia Triple Helix Association)**

We won “**Medal& Certification from SATHA (South Asia Triple Helix Association)**” for our final year project “**Continuous Mode Biomass GasifierReactorFor Thermal Application**”.

➤ **World IP Day**

We also participated in **World IP Day** organized by **IPO (Intellectual property organization)** office Lahore where we are awarded by appreciation certificate on our exceptional work in our project by **Ex-Chief Justice** Mr.TassaduqHussainJillani along with the credible panel of judges.

➤ **BNU Bestival'17**

We participated in **BNU Bestival** in **entrepreneurial** category and receive appreciation certificate from there.

➤ **GCIP'17 (Global Clean tech Innovation Program) by UNIDO**

We also participated in **GCIP (Global Clean tech Innovation Program)** organized by **UNIDO** and we have qualified **semifinalist** round then they recommend us to attend National Academy for **semifinalist**, then after that now we are attending **webinars** and preparing for the final round which is about to held in October.

➤ **Appreciation from Director General UMT**

We qualified for the **prize money** announced by **Director General UMT Mr. Abid Sharwani**, for qualifying **semifinalist round** of **GCIP'17** organized by **UNIDO (United Nation Industrial Development Program)**.

TABLE OF CONTENTS

CHAPTER 1 INTRODUCTION	1
1.1 AN OVERVIEW OF BIOMASS ENERGY UTILIZATION IN PAKISTAN.....	3
1.3RICE SECTOR OF PAKISTAN	5
1.4HISTORICAL BACKGROUND OF THE DOWN LIT DOWN DRAFT (DLDD) TECHNOLOGY	5
1.5HISTORICAL BACKGROUND OF RICE HUSK GASIFIER DEVELOPMENT	6
1.6BENEFIT OF THE TECHNOLOGY.....	7
CHAPTER 2 RICE HUSK GASIFICATION	8
2.1 RICE HUSK	8
2.2 PRINCIPLES OF RICE HUSK GASIFICATION.....	9
2.3 FACTORS THAT AFFECT GASIFICATION	10
2.3.1 ENERGY OF FUEL.....	10
2.3.2 MOISTURE IN FUEL	10
2.3.3 SIZE, FORM AND DISTRIBUTION OF RICE HUSK.....	11
2.3.4 REACTOR’S TEMPERATURE.....	11
CHAPTER 3: RICE HUSK GASIFIER REACTOR	12
3.1DIFFERENT TYPES OF RICE HUSK GASIFIERS	12
3.1.1 FIXED-BED GASIFIER	12
3.1.2 DOWNDRAFT-TYPE GASIFIER	12

3.1.3 CROSS DRAFT-TYPE GASIFIER	13
3.1.4 UPDRAFT-TYPE GASIFIER	14
3.1.5 FLUIDIZED BED GASIFIER	14
3.2RICE HUSK GASIFIER REACTORCOMPONENTS.....	15
3.2.1 FEED HOPPER.....	15
3.2.2 THE GASIFIER REACTOR	15
3.2.3 FAN	16
3.2.4 TUNNEL FOR PASSING AIR.....	17
3.2.5 CHAR BOX	17
3.2.6 CHAR PAN	18
3.2.7 SUPPORTING FRAME	18
3.3ADVANTAGES OF GASIFIER.....	19
3.4 LIMITATIONS OF GASIFIER.....	20
3.5WORKING PRINCIPLE	20
3.6DESIGN PARAMETERS OF GASIFIER	22
CHAPTER 4: INTRODUCTION OF MANUFACTURING	24
4.1 OVERVIEW	24
4.2 WELDING	25
4.3 SHIELDED METAL ARC WELDING (SMAW)	25
4.4 ROLLING PROCESS	26
4.5 BENDING.....	27

4.5.1 STRETCH BENDING AND FORMING	27

CHAPTER 1: INTRODUCTION

1. INTRODUCTION

Natural gas is used as a fuel source in Pakistan. The Natural gas is used by industries for running boilers and furnaces, in urban areas and some of the rural areas where it is accessible. Sui Northern Gas Pipelines Limited (SNGPL) is the governing body to supply Natural gas all over the Pakistan but it is kept failing to do so.
