Acknowledgment

We want to thank ALLAH SWT, who blessed us such great parents and teachers it is due to Him, we were able to do momentous task of the project. We thank our project advisor Mam Emmen Farooq with gratitude and respect, who made it possible by guiding and mentoring us all along the project from the very first step to the last step. All of the teachers who taught us have a role in developing our skills through which we are now able to do tasks we were never able to do so. We would also like to thank people who were helpful to us and shared their experience.

This project wills the small stores, marts and bakeries for entry and checking the old records etc.

Project Title : Online Shop

Objective

This project a fully functional point of sale. The purpose of this project is to decrease the labor work of data entry, check and balance of the old records and decrease the use of papers.

Documentation

Abstract

This project is an attempt to provide the advantages of online shopping to customers of a real shop. It helps buying the products in the shop anywhere through internet. Thus the customer will get the service of online shopping and home delivery from his favorite shop.

The project objective is to deliver the online shopping website into its own separate platform. If shops are providing an online portal where their customers can enjoy easy shopping, the shops won't be losing any more customers to the trending online shops such as flipcart or ebay. Since the application is available in the Smartphone it is easily accessible and always available.

Shopping cart is a very important feature used in e-commerce to assist people making purchases online, similar to the US English term 'shopping cart'. The business-to-consumer aspect of electronic commerce (e-commerce) is the most visible business use of the World Wide Web. The primary goal of an e-commerce site is to sell goods and services online.
