ACKNOWLEDGEMENT

I thank ALLAH for giving me strength and for all my accomplishment. I am grateful to my parents for their untiring and unconditional support and assistance during my project and otherwise. The biggest thanks to my teachers and mentors at UMT for guiding me through every step of this thesis and making me reach this milestone.

ABSTRACT

AMAL “A Village of Hope”. AMAL is an Arabic word which means hope and in Urdu it means to implement I want this place to be a hope for the orphans and homeless children. The journey of growing up is overwhelming. Gradually you change from someone so vulnerable to ultimately surrounding yourself by a shell of maturity. Childhood is also a very tender and delicate stage in the lifespan of human being. Requires a great deal of love care and affection. This place will provide them all the facilities which they will be needing to cope up with world Providing an environment for the orphans and homeless that will nurture them to be strong, confident and educated individuals. Their personalities will be a role model for the world as they will be skilled, hardworking and independent. They will have a home with love, happiness and care along with a physically, emotionally and spiritually nourishing environment Quality living and standard education with recreational and creative activities to make them their lives fun and happening the goal is to develop a conducive learning environment to boost the cognitive development. of the child and the ability to explore and learn new skills. The objective is to apply a community integrating design by providing communal spaces for social interaction for social growth. This can also lead to children being able to learn how to take initiative and react positively to the challenges they will face, saving them from exploitation that can lead them to become criminals and transforming them into future leaders. By giving them hope.

1 INTRODUCTION

1.1 DEFINING THE PROJECT

Childhood is a tender and delicate stage in the life span of a human being. At this stage people require a great deal of care, love, affection and nurture mentally physically and emotionally in order to have a robust set of values and morals. To develop a better personality of a child it is very important that he or she should be given different opportunities the required care, love and nurture. But there are many children not fortunate enough like we are, yes, I am talking about orphans and homeless children if they are not having a family that doesn't make them any less of a human.
