Abstract

Academic Management System is designed to minimize the loop holes of an educational institution. It is a kind of system that can increase the efficiency in managing the course documents, assignments and reports. It can reduce the workloads of teacher and also save time in collecting the paper works from students in academics. Due to the lack of a simple, user friendly Academic Management System for the primary, secondary academic and private education sectors, this project aims to develop an AMS based on some rules for web usability design as well as to provide a centralized education system for students,6 guardians and teachers in course documents and assignments management. The system will provide a login module for members to facilitate the application procedure.
