DEDICATION

To my parents

Without their affection and participation this endeavor would have been impossible.

ACKNOWLEDGEMENT

I owe my gratitude to so many people who helped me and supported me in accomplishing my work in time. Beyond my words, I am thankful to ALLAH Almighty for enabling me to overcome hurdles in the way of my research and guiding me to complete my research in time.

Moreover, I am highly grateful to my supervisor Dr. Ather Khurshid, for his proper guidance and help throughout the journey of my research.

I am grateful to my family especially my parents who always make ways easy for me. Their care and love enabled me to accomplish my mission. I am thankful to my friends who supported me throughout my research.

Abstract

The title of my thesis is “Case Markers in Punjabi Language”. This study elaborates the present range of case markers and their organization and use in targeted language. It helps to suggest the range of disparity in case marking in Punjabi and offers a comprehensive exploration, how semantic case marking is used for its argument charting. It would help to determine specific case markers with restricted semantic sense and usage along with similarities and difference in Urdu and English language. The aim of this dissertation was to detect a probable footing for an instructive study of the perceived asymmetrical case marking in this language which is provided by elaborated examples and comparisons from Urdu. The research is conducted by consulting data and presents a qualitative analysis of this aspect of Punjabi Grammar. Case marking is significant to determine the place of noun within syntactic arrangement. Sentences are collected according to case marker and requirement of its analysis. This research is conducted by presenting comparison of Punjabi language and its grammar with Urdu and Punjabi. It suggests marked similarities and differences between Urdu and Punjabi language. This study is significant for it provides a window to Punjabi Grammar and Its Case Markers.

CHAPTER 1

INTRODUCTION

1.4 Purpose of the Study

This study intends to deliver in depth analysis of the case marking structure in Punjabi Language. It helps to suggest the range of disparity in case marking in Punjabi and offers a comprehensive exploration, how semantic case marking is used for its argument charting. It would help to determine specific case markers with restricted semantic sense and usage along with similarities and difference in Urdu and English language. The aim of this dissertation is to detect a probable footing for an instructive study of the perceived asymmetrical case marking in this language. Case marking system of Punjabi language will help analyzing its grammatical structure with proper semantic usage.
