# 1 Acknowledgement

It is our privilege to express our sincerest regards to our project coordinator, **Mr. Muhammad Awais**, for their valuable inputs, guidance, encouragement, whole-hearted cooperation and constructive criticism throughout the duration of our project (CP-1 and CP-2). We deeply express our sincere thanks to our Head of Department **Dr. Nabeel Amin** for encouraging and allowing us to present the project on the topic “**Sewing Faults in Denim/Trouser and their remedies**” at our department premises for the partial fulfillment of the requirements leading to the award of **BS Textile Engineering**. We take this opportunity to thank **all our lecturers** who have directly or indirectly helped our project. Moreover we are also thankful to **Mr Zakaullah (Production Manager)** and **Mr Shoaib Khalid (Assistant Manager HR department)** in Azgard9, Managa Mandi, Lahore. We pay our respects and love to our parents and all other family members and friends for their love and encouragement throughout our career. Last but not the least we express our thanks to our friends for their cooperation and support.

## 2 Abstract

In Garments manufacturing Unit, Sewing department is one of the most important arenas which have direct or indirect great impact over the efficiency of overall manufacturing unit. Now our project concentration is also directed with the faults or problems in sewing section. If these faults can be eliminated or minimized then this will be very fruitful for garments manufacturing unit. Thus, in this project, initially we have to point out the major sewing faults and then we shall have also suggested some remedies or methodology to avoid from these problems.

Project has based on two phases first we have collected data about the faults and secondly by using the questionnaires we have collected the rejection analysis. This analysis has actually given us the percentage of the different faults regarding fabric, stitching, washing and finishing. Our methodology to achieve our states objectives is that first of all we have visited different factories to collect the actual data about the faults and rejection respectively. We have found the stitching faults and then we have find out the remedies by consulting the literature and the knowledge we have got during our studies. Rejection analysis has given us the impact of these faults on cost of production and wastage of resources as well.

After doing this analysis we have been able to find out that which area is more responsible for the rejection of the garment. Then we came up with the suggestion and remedies so that by keeping these points in view industry people could learn to avoid these faults, hopefully productivity would be improved. This will be actually the impact of our project on industry.

# Table of Contents

<b>1 Acknowledgement</b> .....	<b>2</b>
<b>2 Abstract</b> .....	<b>3</b>
<b>3 Introduction</b> .....	<b>6</b>
3.1 History of the Textile Industry .....	6
3.2 Importance of the textile Industry.....	7
3.4 Sectors of Textile industry.....	7
3.4.1 Spinning.....	7
3.4.2 Weaving .....	8
3.4.3 Processing .....	8
3.4.4 Garment Manufacturing .....	9
3.5 Garments Production Process.....	9
3.6 Sewing Department .....	10
3.6.1 Layout of sewing process .....	11
3.7 Why do Faults occur?.....	11
3.8 Sewing Faults .....	11
<b>4 Objectives of Study</b> .....	<b>13</b>
<b>5 Literature review</b> .....	<b>14</b>
5.1 Feed Puckering (Uneven Ply Feeding).....	16
5.1.1 Identification .....	16
5.2 Thread Tension Puckering.....	16
5.2.1 Identification .....	17
5.3 Breaking Needles .....	17
5.4 Skipping Stitches .....	17
<b>7 State of Technology:</b> .....	<b>21</b>
<b>8 Practical Work and Calculations</b> .....	<b>21</b>
8.1 Sewing faults and their Remedies with respect to material:.....	21
8.1.1. Fabric:- .....	22
8.1.2. During cutting:- .....	22
8.1.3. Due to operator:- .....	22
8.1.4. Due to machine:-.....	23

8.1.5. Due to improper handling:- .....	23
8.2 Sewing thread .....	23
8.3 Housekeeping defects:- .....	24
8.4 Sewing Faults and their remedies, with respect to Machine .....	24
8.4.1 Thread Breakage .....	25
8.4.2 Jam stitch (Skip Stitch): .....	29
8.4.3 Wrong stitch:.....	30
8.4.4 Needle breakage:.....	30
8.4.5 Feed dog:.....	31
8.4.6 Operator skill:.....	32
8.4.7 Machine maintenance: .....	32
8.5 Type of denim stitching faults, reasons and their remedies.....	33
8.5.1 Skipped stitches .....	33
8.5.2 Disappearing Stitches:- .....	33
8.5.3 Open seam-seam failure fabric:-.....	34
8.5.4 Seam failure- seam slippage .....	35
8.5.5 Excessive seam grin.....	35
8.5.6 Restitched Seams/Broken Stitches .....	36
8.5.7 Solutions to Feed Puckering.....	37
8.5.8 Solutions to Tension Puckering.....	38
8.5.9 Unraveling Seams:.....	39
8.6 Suggestions for safe operation: .....	40
<b>9 Results.....</b>	<b>41</b>
<b>11 Bibliography.....</b>	<b>45</b>
