## **Abstract**

It is a study of physical, educational, social, and psychological needs of the street and homeless children, who have been neglected and deprived from several reasons. Those who may have been physically, sexually, emotionally abused and physically and emotionally neglected, addicted to drugs and beggary. The main focus of the project is to create an environment which will synchronize the psychology of the neglected children, as psychology is the most fragile aspect in a child. The protection center will serve as a physical place which supplements the damaged mental states of the neglected children. Substantially, a new horizon in the wake of project's apprehension towards its approach and ingression awaits the neglected ones' life to be mourned and provoked to a better and a mobilized state of appease and a good society.

## **DEDICATION**

I dedicate my project to the street and homeless children suffering all over the world, waiting for a day when someone will come to help them and put them out of such miserable conditions.

## ACKNOWLEDGEMENT

The thesis is always a result of collaboration of many people. I would like to thank all of these people for ever being there when I needed them.

First of all I deliver wholesome thanksgiving to **God**, my refuge and strength, an everpresent help in trouble. Thank God for the wisdom and perseverance that he has been bestowed upon me during this research project, and indeed, throughout my life: "I can do everything through him who gives me strength.

I thank my parents for their unconditional support, both financially and emotionally throughout my degree.

# CHAPTER 1

## INTRODUCTION TO TOPIC

### **1.1 Overall Introduction:**

Children have the tendency to inculcate their mental approach in consent with the physiological environment which surrounds them and corresponding to the fact, there may not be any chance taken to replicate the conventional and in-effective ways of adaption for a moderately marginalized environment.

The dilemma of filtering a destination for the research work worth it when the fact came to the forefront as there is a lack in the Child development sector. Much less work is seen operational in Pakistan contrary to the need of expanding the operations for welfare and development.
