ACKNOWLEDGEMENTS

I extend my heart-felt gratitude to the Honourable Rector UMT, Dr. Hasan Sohaib Murad, who has been kind enough to help me continue my educational pursuits. I also appreciate the patience and acknowledge the moral help of Chairman DELL, Dr. Muhammad Shaban Rafi, and my Ex-supervisor, Professor Rao Jaleel Ahmad, who have always boosted my courage during my rehabilitation period after a severe accident. A vote of thanks is also due to my physicians: an ophthalmologist (Dr. Asim Waseem), a dentist (Dr. Waseem Ahmad) and an ENT specialist (Dr. Hafiz Muhammad Yaseen) who have helped me come back to life after recovering from my injury. I also extend my heartiest feelings of gratitude to my friend Marsha Gravesen and her son, Jason Varvoutis, who have reviewed this research work for grammatical accuracy. Above all, I am grateful for the professional expertise of my new supervisor, Dr. Maria Maldonado, who has helped me expedite my delayed work.

I feel deep gratitude for all those who have helped me complete my research dissertation.

ABSTRACT

This dissertation aims to explore how group work may be effectively utilized as part of the classroom dynamic to aid in developing oral English language skills. Specifically, we will look at one hundred under-privileged students studying English in the US funded English Access Microscholarship Program in Kasur District. In recent educational research, there has been great emphasis on the impact that group work can have on students' confidence, improving it to the point where they can exhibit their abilities without the interference or assistance of the teacher. The present exploratory study follows quasi-experimental methods to investigate the impact of group work on the speaking skills of these Access students over a period of three months. Research data has been collected through a pre-test and a post-test and two survey questionnaires designed for both the Access students and their English language teachers. We have adopted an objective approach to analyze and describe the data statistically. The major finding indicates that if group work is included in the classroom dynamic while teaching L2 speaking skills in PELT context, language teachers can raise the confidence and fluency of their students both in a classroom setting and social discourse. To conclude, if institutes and ELT experts put more emphasis on group formation in the classroom, students' fluency in L2 can be considerably enhanced.

Key Words: Group dynamics, collaborative tasks, lock-step teaching, active speaking, interpersonal discourse, communicative competence

CHAPTER 1

INTRODUCTION

1.1 Purpose

This research dissertation is an exploratory study on how group work can be effectively utilized to improve the development of oral English language skills. The subjects of the study consist of under-privileged students (hereafter, Access students) who study under the US funded English Access Microscholarship Program (hereafter, Access Program) in Punjab Workers Welfare Schools for Boys and Girls in Kasur District.
