Group work Documents- To track who has done what part of the project

Date	Member Names	Description
28/10/2014	Zaman Ashraf	Draft updated, police officer information and system
	Asif Raza	Database information
	Asim Hussain	Administration information
	Faisal Saddam	Defaulter information
	Kaswar Abbas	Account information

Proposal:

Introduction

We are going to design an online challan form system for the business practices of department of traffic police. By using our system traffic police department management will ensure finest use of challan records of the defaulter as creation and retrieval of the data of the defaulter effortless. We will design this system as to make its usage user friendly, which makes adoption of challan management by the traffic police personnel quick and easy.

This application records everything right from the issue challan of the defaulter to what kind of payment methods he may have and how he will get his documents back. Everything in detail will be available with this application. To round off, our System provides the benefits of efficient operations, enhanced administration and control, defaulter ease of paying challan, strict revenue control and improved profitability.
