**A THESIS CONSENTED TO THE
UNIVERSITY OF MANAGEMENT AND TECHNOLOGY**

In partial completion of the requirements for the

Degree

Bachelors of Textile Design

School of Textile and Design

January 2018

Acknowledgment

I am most grateful to the almighty God for his abundant grace that has brought me this far. This thesis would not have been possible without the help, guidance and patience of my supervisor Mr. Adil Maqsood, I am extremely grateful. . Finally, I acknowledge the support, prayers and encouragement of my mother, brothers and sisters.

Abstract

The enormous, blue and calm oceans are the signatures of Planet Earth. It hides incredible beauty along its depth. It includes the motion of waves, plants, animals and many other creatures. It beauty rejuvenates my spirit. For me, aquatic life always represented escape, new beginnings and adventure. The color and texture of water and other things enhance its beauty. It has rhythmic pulse.

CHAPTER

1.0 INTRODUCTION

1.1 Background to the Study

In our planet life concerns with the ocean, as it is the wellsprings of worth, evaluation and opulence. Salt water is covered with about 71% surface in our planet.[1] On this planet ocean carries 99% of living area. [2] It is the place the forces of weight and lack of definition have offered rise to creatures as different as on various planets. A few meters underneath the surface lies the world where time has halted. It gives food, imperativeness and the main water and bolster the occupations of the innumerable people. [1] Under the front of duskiness a radical new universe of creatures rises from the significance. Life in water is exceptionally special in connection to life aground. Each stone and weed in the ocean is a home to different creature gatherings. Life appears to flourish here and a substantial number of fish devour upon minute fish and green development collection of sea creatures like fishes, octopus, seahorse, stick points, sea urchins, corals and sea shells et cetera present under ocean which are distinctive in types, size, shapes and shades. The animals that live in land and water proficient life require some extraordinary changes in accordance with make due; here are just a few things like gills, blow out, scales, shells, suction mugs, tube feet, extreme skin, Glover, flippers and floaters. From the best fish on the planet swimming solo to schools of little fish that number in the hundreds or thousands.
