# To Design and Implementation of Three Phase Power Quality Analyzer

Submitted to the faculty of the Electrical Engineering Department  
of the University of Management and Technology Lahore  
in partial fulfillment of the requirements for the Degree of

Bachelor of Science

In

Electrical Engineering.

• Project Advisor

Co-Advisor

Director  
Undergraduate Studies

**Department of Electrical Engineering**  
**School of Engineering**  
**University of Management and Technology Lahore**

## *Declaration*

We declare that the work contained in this thesis is my own, except where explicitly stated otherwise. In addition this work has not been submitted to obtain another degree or professional qualification.

Signed:

HusnainZakri

Kamran Saleem

Rehan Butt

Abu BakarMukhtar

## *Acknowledgments*

The acknowledgements and the people to thank go here, don't forget to include your project advisor. . .

## *Statement of Authentication*

The author of this paper declares that he/she has prepared the submitted work himself/ herself, unassisted and without using any other resources other than those indicated. All the direct or indirect cited information from other sources (including electronic sources) is duly acknowledged without exceptions. The material, in this or similar form, has not been previously submitted, either in full or in part, for other exams at this or any other academic institution.

## *Abstract*

This Project is to Analyze the three phase power quality to insure power reliability, this project is based on the concepts that now a days the main energy source is electrical power for the mass applications of industry and home appliances so the energy source is needed to be checked and maintained for good quality to achieve best results for which the power is used.
