ABSTRACT

TOPIC: LUNAR (THE HOUSE OF GALAXIES)

Café culture is comparatively new in Lahore. In Karachi, the concept of cafés have been well known before thousand years than Lahore, it got introduced with espresso, tea and friends, as the way of life got advanced, the trend of establishment of overnight coffeehouses became a fashion in Lahore, leaping up on every corner. In contemporary era this culture of spending quality 'personal time' in a coffeehouse has blown out universally. I aspire to invent something that has never been done before. The plan is to build up a bistro which will show the earth of moon. The appearance of (bistro structure) would be of half of the equator keeping in mind the theme of the café, the idea is chosen of the hemisphere because it resembles to the shape of moon and its interior would be according to the topic. The bistro aesthetics will be made fascinating, glamorous, calming and relaxing where people can come with their loved ones to enjoy the soothing environment. The prime reason for making this bistro is to allure clients to make them feel like they are enjoying their meal at moon.

The web design based steel structure will be exterior of the café. As the steel frame structure will give soft appearance to the café. Structural reference of bistro is taken from the great architect Zaha Hadid. As, steel has for quite some time been a standby material for design system, results can be moving when it's perceived for its natural magnificence and its basic respectability. Magnificence of steel exhibit the metal's adaptability and consistent combination with glass, stone, and different materials all the more much of the time utilized for façades. The stainless-steel exterior of building has a visually soft appearance. The building materials used in her famous works are:

- The outside of the building will be clad in aluminum and stone while the inside highlights glass, terrazzo, stainless steel and glass strengthened gypsum.
- Glass fiber reinforced concrete (GFRC) and glass fiber reinforced polyester (GFRP) are chosen as ideal cladding materials.

Structural reference

LUNAR (THE HOUSE OF GALAXIES)

The inside depends on the moon's environment so, the materials which will give bistro entrancing, impressive, quieting and unwinding style will be utilized. The materials like velvet for couches, backdrops, light to make unwinding condition, and appropriate materials for table and other detailing. The usage of things will be amended to be used at right places which decorates the excellence of bistro making the environment realistic, which will make individuals more relaxed. The lights will be used on the ceiling which will enhance the beauty of café, everything will be according to theme.

My goal is to affect individuals to feel that they are in moon's environment, I have to make something new that has never been done and I need to pitch my plan to the budgetary bosses (financial specialists). I surmise that my thesis topic is extraordinary from others which can build enthusiasm for people to observe this bistro and because of its uniqueness it will get more prominent in environment. The expected outcomes of this project are that It's an exceptional idea and the speculators would love it, They will be set up to contribute and will get it, They will get more advantage since it's extraordinary and It will end up being a decent open spot if practical.

INTRODUCTION

Bistro, it is outstanding that a little eatery or bistro in France where you can have brisk and basic feast is known as a bistro. It is an eatery, serving respectably estimated straightforward suppers in an unassuming setting. They are little casual eateries characterized for the most part by the nourishments they serve. French home-style cooking, and moderate cooked sustenance's like cassoulet, a bean stew, are run of the mill.

The Old French Bistro by Olivier Le Queinec

Bistros likely created out of the storm cellar kitchens of Parisian flats where inhabitants paid for both food and lodging. Owners could supplement their salary by opening their kitchen to the paying open. Menus were worked around nourishments that were basic, could be set up in amount and would keep after some time. Wine and espresso were additionally served.
