## ACKNOWLEDGMENT

No one can know the potential,  
Of a life that is committed to win;  
With courage- the challenge it faces,  
To achieve success in the end!

All glory and honor to Allah, The Supreme being who bestowed profound persistence, and ability on us to accomplish this work. We dedicate our dissertation work to our families. A special feeling of gratitude to our loving parents; we also dedicate this dissertation to our many friends who have supported us throughout the process. We give special thanks to TAYYABA **ANEES** and **ZUNAIRA NAZIR** for giving us the opportunity to prepare this report.

## Panel of Examiners

**1) Head of Department**

Department of computer science  
UMT Lahore.

---

**2) Program Director (Final of Year)**

**Project Title :** OTEG.com (ordinary teen extra-ordinary good)

**Objective:** The objective is to provide all kind of information of universities of the targeted cities.

**Undertaken by :**

**Shumaila Khaliq (13005065298)**

**Qandeel Ghafoor (13004105029)**

**Amna Nasir (13005065200)**

**Ahmad Sakhawat Ali (13005065151)**

**Supervised by:** Dr. TAYYABA ANEES

**Starting Date:** 1<sup>st</sup> Nov 2016

**Completion Date:** 31<sup>st</sup> July 2017

**Tools Used :**

- Sublime
- Draw.io
- Microsoft word
- Visual Paradigm
- Word press
- Wamp

## **Abstract**

The project is about to give an online social website to the user for getting all kind of information of universities to the target cities that will facilitate admin, students, teachers and technical staff on a single platform. There is always problem with the people to visit different sites of universities when they want to get information about admissions opened geographical locations of universities, which universities are offering which courses, and many more things. People don't have a lot of knowledge about universities. So, that we have a solution of all those problems which is the project "OTEG.com". This site will give them a lot of information, latest news of admissions, scholarships, hostel facilities etc. It will help the user to search all the required information of universities to the target cities on a single platform. The users would be able get their desired information on single platform. The users will be asked to register, after being registered they will be able join discussion forum and will also be able to use blog postings and will automatically get alert latest information of admissions opened. This will reduce the time and effort of users.

# 1. INTRODUCTION

---

## 1.1 Motivation

Students face many problems in selecting universities for their studies. As students when we were at intermediate level and wanted to take admission in bachelors, we faced many problems. Because we even did not know about universities of our own area and even did not have any kind of information about ranking of universities. So we want to solve this problem, so that other students like us do not face this problem and on a single platform they would find all universities. So they could select any university according to their capabilities. Students from our single platform will be able to see all desired information of universities and will also be able to discuss their queries.

## 1.2 Project Overview

1.3 This project is an online single platform for the users for getting desired information about universities of targeted cities of Pakistan. This platform/website will facilitate many users like students, teachers and all common educated people. Users can view and search universities by city, by ranking (HEC), by location. Users will also be able to know about the conveyance and hostel facility of universities directly. There will be a discussion form where users would discuss their knowledge. Users would also post blogs and see blogs, would see upcoming events, latest news about admissions. We, at this level, will target only universities of four major cities of Pakistan (Lahore, Karachi, Islamabad, and Multan). On a single platform users would be able to find their desired university and their information. Users would be able to know about all universities about which they do not have knowledge.
