Dedication

We want to thank Allah almighty for the completion of final year project and our degree of Software Engineering. Completion of our project was not a single man's effort, it was effort of friends who worked as a team. Similarly, completion of our degree is not a single man's task, we want to dedicate this achievement to our teachers who worked hard on us and made things easier for us to understand and also to our parents who never gave up on us and supported us through every thick and thin to achieve this success. We dedicate our project to Mr. Sajid Mahmood who really helped us in the completion of this project, we also dedicate this project to those friends or people who helped us in its completion.

Final Approval

Panel of Examiners

Acknowledgment

I am grateful and would like to express my sincere gratitude to my supervisor Mr. Sajid Mahmood for his invaluable guidance, continuous encouragement and constant support in making this research possible. I really appreciate his guidance.

From the initial to the final level that enabled me to develop an understanding of this Research thoroughly. Without his advice and assistance, it would be a lot tougher to Completion. I also sincerely thank for the time spent proofreading and correcting my Mistakes.

I acknowledge my sincere indebtedness and gratitude to my parents for their Love, dream and sacrifice throughout my life. I am thankful for their sacrifice, Patience, and understanding that were inevitable to make this work possible. Their Sacrifice had inspired me from the day I learned how to read and write until what I have Become now. I cannot find the appropriate words that could properly describe my Appreciation for their devotion, support and faith in my ability to achieve my dreams. Lastly, I would like to thanks any person which contributes to my final year Project directly or indirectly. I would like to acknowledge their comments and Suggestions, which was crucial for the successful completion of this study.

Operating System Window7.

Documentation

Abstract

The main idea of this project is that students/users will be able to select the educational institute/campus of their choice program more easily. Students find it difficult to locate institutes for higher education. This also includes locating the institute with desired program, education structure, fee, faculty information, admission dates and also the scholarship programs. It is not easy to visit every institute for finding the above information. We will develop an application (Mobile + Web) for helping students/users to find the right institute. The student/user will be able to explore the educational institutes in multiple dimensions e.g. programs, admission fee, admission dates, faculty, location, scholarships. The user may opt to choose one dimension or a combination of dimension for selection of institute. The user can view/get detailed information about a campus/institute e.g. location, program, faculty, fee and scholarship. The users can add favorite tags to their profiles for getting alerts regarding their favorites.

REVISION CHART

This chart contains a history of this document's revisions. The entries below are provided solely for illustration purposes. Those entries should be deleted until the revision/s they refer to have actually been created.

The document itself should be stored in revision control, and a brief description of each version should be entered in the Revision Control System. A brief description can be repeated in this section. Revisions need not be described elsewhere in the document, unless they explain the document.

Version	Primary Author(s)	Description of Version	Date Completed
<i>Draft</i>	TBD	Initial draft created for distribution and review comments	(To be decided) TBD
<i>Preliminary</i>	TBD	Second draft incorporating initial review comments, distributed for final review	TBD
<i>Final</i>	TBD	First complete draft, which is placed under change control	TBD
<i>Revision 1</i>	TBD	Revised draft, revised according to the change control process and maintained under change control	TBD
<i>Revision 2</i>	TBD	Revised draft, revised according to the change control process and maintained under change control	TBD
<i>Etc.</i>	TBD	TBD	TBD

1. INTRODUCTION

1.1 Motivations

As people face many difficulties in finding the educational institute. For this they rush around which make difficult to find the right institute per their preferences. So, to resolve this issue we are proposing the idea of educational institute finder (Web + App) which will help students/Guardians/parents and reduce stress. So, we take this idea and discuss with our professor Dr. Sajid Mahmood as a final year project.
