Acknowledgements:

I am devouring this occasion to offer my thanks to everybody who strengthened me over the span of this thesis. I am appreciative for their yearning direction, significantly helpful feedback and inviting guidance amid the undertaking work. I am genuinely thankful to them for sharing their honest and enlightening perspectives on various issues identified with the task.

I would like to thank my parents for their participation; they supported me at every hour and helped me to get best results.

I am also grateful to my teachers (Miss Sidra Batool, Miss Amna Manzoor, Miss Anika Sitara, Miss Sara, Sir Adil, Sir Ali Imran, Sir Naveed and Sir Mudasser), they planted a seed of knowledge in me and acted as a bridge to step me towards success, they overcome numerous obstacles I faced during work.

In addition I would like to express my gratitude towards my friends especially Ramsha, saima and maryam who helped me till the last minute. They were always with me during market surveys and visits.

Last but not the least, I would like to thank my brother and my mother for supporting me throughout my thesis work and my life in general. Additionally I would like to thank my father for all the financial and emotional support he gave me.

Dedication and Dissertation:

This dissertation is the result of my own work and contains nothing which is the outcome of work done in collaboration except as declared in the Preface and specified in the text.

It is not considerably the same as any that I have submitted, or, is being simultaneously submitted for a degree or diploma or other qualification at the **University of management and technology** or any other University or similar institution except as professed in the Preface and specified in the text.

I just want to dedicate my thesis and dissertation to my mother and my teachers who is the continuous sources of inspiration and motivation. Without their motivation I would never be able to achieve this.

Abstract:

Astrology is quite common now a days. It was considered as some source of knowledge of the divine but is also read for fun now. The study of stars moon and galaxy is relatively interesting for those who have keen attentiveness in it. However the culture is famous among Pakistanis to read about stars and relate it to their personal lives but astrology is beyond the general information. We can gather a lot of things from it and apply it in our daily working career.

Astrology literally means the study (or science, reliant on how one translates the Greek word logos) of the stars. Most people are aware with only a petite portion of the science of the stars, namely the 12 signs namely as Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius, and Pisces.

In this thesis work, the astrology is not directly related to the study of it but rather with the symbols and sign used accordingly to the fashion technique. Using a mixture of these signs to develop some new fashion look. Moreover using the variety of galaxy portions along with zodiac sign to bring something new to the field.

Chapter 1

Introduction:

Astrology has been around since 2,000 B.C. from the people of Babylon (now part of Iraq). They produced charts which helped them to predict any astronomical events. Now a day the entire world is engaged in these astrological activities but they were first introduced to Greek around 4th century B.C. which was then forwarded to the Romans. The astrological names for the stars which are still used today were endorsed by the Romans. Afterwards Arab got engaged in these activities likewise the astrology spread out the entire world. Theorists and Astrologers rolled their lives around man and star associations. Astrology started off in what way the sun, moon, planets, and stars, are hypothetically connected to life events. But early people used astrology just to predict the weather patterns just for the agricultural purposes. Later as people became more aware of the usage they broadened their scope to predict the natural disasters and all the major activities that involved human affairs like war etc.
