GOHAR ALI	101520-014

Project Submitted To The Faculty Of School Of Science and Technology,  
University Of Management And Technology

In Partial Fulfillment Of The Requirements For The Degree  
Of  
BS  
Computer Science

Advisor

Chairman

**In The Name of Allah**

**The Most Beneficent The Most Merciful**

“Say! He is God, the One!

The Eternally Besought of all!

He does not beget, nor is He begotten,

And there is nothing comparable to Him.”

# **Gratitude to Allah**

We pay our special gratitude to Allah Almighty who is sole owner of this universe and helped us whenever we prayed for His assistance. He has blessed us with what we were looking to accomplish and helped us out by holding our hands during hurdles. We have no words to express our deepest feelings of gratitude to Almighty, Compassionate, and Supreme Allah. We thank Him for what we have achieved and consider each and everything as a gift from Him. Though the element of luck cannot be ruled out. But Allah provided us the faith and determination to grasp the opportunities for the completion of a successful project.

# Acknowledgement

We thankfully dedicate this project to those people who were involved in this project and guided us with their supreme efforts. Firstly, I would I express my intense sense of respect to my supervisor and mentor Mr. Abubakar Siddique, for his relentless guidance and steady help during the project, although we disturbed him a lot but he never give us a cold look. His in-depth knowledge on a broad spectrum of Website Development and Designing has been extremely beneficial for us. His willingness to give his time so generously has been very much appreciated. We are thankful to the Almighty for giving us a counselor like him.

I would like to express my appreciation to the Dean, School of Science and Technology, Dr. Abdul Aziz Bhatti and also to the Chairman of Computer Science Department, Dr. Malik Tahir Hassan for their support and help towards my graduate affairs. My acknowledgement also goes to all the technicians and office staffs of School of Science and Technology for their co-operations.

Last but not the least, our deepest gratitude goes to our parents for their love, support and sufferings during our studies and project. We wouldn't be able to reach this point without their prayers and encouragement. Thank you very much.

## **Preface**

We researched a lot in different topics to pick something decent enough that can be accepted as a project and is beneficial for others as well. We had been taking unremitting assistance of our advisor and other faculty members. After a timely search, we come up with the idea of introducing a platform of matchmaking in Pakistan where marriage is consider to be as important as living. There are few Matrimonial Websites for Muslims, but they don't seem up to the mark.

So, we decided to build a website in this business that can be attractive and time saving for the busy generation of today's. We keep in mind that our families are very conservative about looking for a life partner, and so

we present with the best solution to them by preparing a perfect recipe of demands of the family and desire of the Bride or Groom.

### 1.1 INTRODUCTION

#### 1.1.1 PROJECT DEFINITION

Matrimonial Website.

#### **What is Matrimonial Web Application?**

Marriage is for uniting two separate souls both physically and spiritually under the pure and true vows. For this purpose, Matrimonial Website provides methods in finding that one person you are willing to commit for the lifetime. These websites covers all the traditional norms, which many people consider as important today as their culture. Keeping in mind the present traditions, values and consents, we have established online matchmaking system that will reflect the commitments and interests of every person looking for a relationship. If you are considering making a marriage commitment, there is no other better option than our application.

Matrimonial Website will allow any user to get registered in few simple steps and a confirmation email to avoid any spam. After providing a verified user email, the account will be activated and the profile will be visible to other members of the website. Similarly, the new user can search and contact the desire user by dropping a message (custom or personal).

For This Application, we will provide following capabilities:

- Admin Login Module.
- User Registration Module.
- User Login Module.
- Search Module.
- Send Testimonial Module.
- Success Story module.
- User profile module.
- Profile Picture Uploading Module.
- Creating album Module.
- Sending Custom Message Module.
- Sending Personal Message Module.
- User Update Module.
- Shortlisted Profile Module.
- Non-Paid Membership Module.
- Paid Membership Module.
