Introduction:-

Pakistan appeared on map fifty –five years ago but its history spans many years of struggle and sacrifices . Pakistan represented a whole new life for Muslims . It came into being with horrible loss of dazed and destitute men , women and children hastened across the border , leaving their homes , land and property to seek refuge . Panic , fear , revenge and reprisals followed . This left on pakistan doorstep seven million refugees , which had to be rehabilitated , clothed , and sheltered . Partition also involved dividing of the assets of the subcontinent . India , being a larger country , got the loins share in all , leaving pakistan with minimal resources , either to survive or build on
