Acknowledgment

I would like to state my deepest gratitude to all those who provided me the possibility to complete this project report. Special thanks I give to my final year project adviser Ms Arifah Azhar, whose contribution in stimulating, suggestions and support helped me to coordinate this project.

Furthermore, I would also like to thank my batch mates who helped me to assemble the parts and gave suggestion about the potential improvements. Many thanks go to the head of the project, staff of the SST department and my teachers.

Project title	Event Management System
Objective	We are going to build a website that will provide a platform where user will create or browse events. They can attend events of their wish.
Undertaken By	Mr. Ahtisham Idrees
Supervised By	Miss Arifah Azhar
Starting Date	November 20, 2015
Completion Date	Feb 20, 2017
Tools Used	PHP storm, Xampp, Notepad++, MYSQL Bootstrap
Documentation	MS word 2016, EMS version 1.4

Abstract

Event management is a hot topic nowadays. People want to attend events and create their own events. We will make an online system which will allow user to create events or browse events to attend.

This will take few steps from create events, publish, browse and then get tickets. This web based application will make events live online. People have not to wander around for events. It will make event management easy.

Revision Chart

Version	Primary Author(s)*	Description of Version	Date Completed
Draft	Ahtisham Idrees	Initial draft created for distribution and review comments	November 6,2015
Preliminary	Ahtisham Idrees	Second draft incorporating initial review comments, distributed for final review	January 9, 2016
Final	Ahtisham Idrees	First complete draft, which is placed under change control	March 20, 2016
Revision 1	Ahtisham Idrees	Revised draft, revised according to the change control process and maintained under change control	December 7,2016
Revision 2	Ahtisham Idrees	Revised draft, revised according to the change control process and maintained under change control	January 7,2017
Revision 3	Ahtisham Idrees	Revised draft, revised according to the change control process and maintained under change control	February 8,2017
<p>* Earlier I had this project in a group with Ahmad Makhdoom but later he left the university so I carried this project alone.</p>

1. INTRODUCTION

Every time when you see a program like '*Film fare*' awards or those pop concerts and beauty pageants you would have wondered how people managed to set up such brilliant shows. Every tiny detail from your entering the venue to your going out is a result of rigorous planning. That's event management for you.

One of the fastest and most glamorous upcoming professions today is Event management, the most profound form of advertising and marketing, is a glamorous and thrilling profession. It provides an opportunity for unleashing one's creative potential to a very high degree. It demands a lot of hard work and effort but at the same time offers enormous scope.

EMS is an online event management system software project that serves the functionality of an event manager. The project provides most of the basic functionalities required for an event. It allows the user to post and view their events. Users can visit the website without login but without registering to the website, they cannot buy tickets for an event and cannot create an event. After buying ticket, User can participate in a particular event and can give feedback about the event.
