## **ABSTRACT**

---

The world is now totally changed into a global village where everyone has an easy excess to everything which is in need. Now a days, it is really hard to find free time out of our busy life's to go out and get them by ourselves due to busy life style. It may be an electronic item, household item, office item etc. To solve such problem online selling is started where everyone should post their product which is available for sell and persons who want to purchase.

Now a day's, online purchasing is become conventional and need especially for used products. And the shops that are currently working for used items make advantage of it and give a very low price at the time of purchasing and a very high or unaffordable price at the time of selling.

The Bidder is an online store where people sell their used/old things and the same opportunity is available for the buyer. The buyer can see the product details with the given price. If the price is reasonable then the buyer must make a higher bid for product.

The main purpose of THE BIDDER is to provide a better price to the product owner.

There is an option for visitors only. Visitors can check the products available for selling, check the specification and also check the recent bids. If he/she want to bid then must registered himself for bidding.
