**In The Name of Allah**  
**The Most Beneficent the Most Merciful**

“Say! He is God the One!  
The Eternally Besought of all!  
He does not beget, nor is he begotten,  
And there is nothing comparable to Him.”

# Gratitude to Allah

We pay our special gratitude to Allah Almighty who is sole owner of this universe and helped us whenever we prayed for His assistance, HE has blessed us with what we were looking to accomplish and helped us out by holding our hands during hurdles. We thank him for what we have achieved and consider each and everything as a gift from him through the element of luck cannot be ruled out. But Allah provided us the faith and determination to grasp the opportunities for the completion of a successful project.

# Acknowledgement

We thankfully dedicate this project to those people who were involved in this project and guided us with their supreme efforts. We would like to express our intense sense of respect to our supervisors and mentor **Mr.Asif Subhani** and **Mr.Abu Bakar Siddique**, for their relentless guidance and steady help during the project. Their in depth knowledge on a broad spectrum of website and mobile application development and designing has been extremely beneficial for us.

Their willingness to give his time so generously has been very much appreciated. We are thankful to the Almighty for giving us a counselor like them.

We would like to express my appreciation to the Dean, school of science and technology, **Dr.NASIR UD DIN GOHR** and also the chairman of computer science Department, **Dr. Tahir Ejaz** for their support and help towards my graduate affairs. Our acknowledgement also goes to all the technicians and office staff of school of science and technology for their co-operations.

Last but not the least, our deepest gratitude goes to our parents for their love, support and suffering during our studies and project. We wouldn't be able to reach this point without their prayers and encouragement.

Thank you very much.

## **Preface**

My Virtual notice board is an android based application designed to ease the life of student in a campus area. Some of its functions include finding and posting about the item they found or lost in the campus and this application can also be used by the societies working in the universities to update students about the ongoing activities on the campus.

Hence the purpose of this project is to make the life of a student easier while studying in the campus. This is an android based application and obviously will be beneficiary for them as well. This Application will provide students of the university and the management of the university to update their dailty time table and events so that students interested can enjoy from that as well. This Product will provide an ease within the university campus.

## Final Approval

##### **What is MyVirtual notice board?**

My Virtual notice board provides the ultimate ease to Students and the university management. This Application is built for helping two major stakeholders, the students who wants to stay up-to-date, and the university who wants to manage things well. We introduce this new and unique product based project to provide an ease to students another future of our product is if someone has lost/found any stuff and some student or staff member has found it they will give it to the admin and the admin will notify it can also be wise wersa the victum can also go to the admin and tell.

This application is designed for the students who are busy in their academic life and in the hustle of that they don't see the board daily but everyone in this era uses smartphone to ease their life. This application will make them more updated about the campus life and also the activities happening in the universities arranged by the societies working in the university. It will also help the students to see their daily academic timetable of classes
