**Session  
2011-2015**

**University of Management and Technology  
C-II Johar Town Lahore Pakistan**

**In The Name of Allah  
The Most Beneficent The Most Merciful**

**“Say! He is God, the One!  
The Eternally Besought of all!  
He does not beget, nor is He begotten,  
And there is nothing comparable to Him.”**

## **Dedication**

We dedicate our project to our parents whose uplifting statements and push have dependably been a source of consistent inspiration. We'd also like to extend our dedication to our Supervisor, co-Supervisor, Program Director, Head of Department and all teachers who inspired us to exceed expectations in life and for imparting adoration for learning in us.

# Gratitude to Allah

We pay our special gratitude to Allah Almighty who is sole owner of this universe and helped us whenever we prayed for His assistance. He has blessed us with what we were looking to accomplish and helped us out by holding our hands during hurdles. We have no words to express our deepest feelings of gratitude to Almighty, Compassionate, and Supreme Allah. We thank Him for what we have achieved and consider each and everything as a gift from Him. Though the element of luck cannot be ruled out. But Allah provided us the faith and determination to grasp the opportunities for the completion of a successful project.

# Final Approval

## Panel of Examiners

- **Head of Department**

DrTahirEjaz

Department of Computer Science

UMT Lahore

---

- **Program Director ( Final Year Projects)**

Syed Farooq Ali

Department of Computer Science

UMT Lahore

---

- **Supervisor**

Muhammad AsifSubhani

Department of Computer Science

UMT Lahore

---

- **Co-Supervisor**

Muhammad AbubakarSiddique

Department of Computer Science

UMT Lahore

---

## **Acknowledgment**

In the name of Allah, the Most Beneficent, the Most Merciful. As a matter of first importance we express gratitude toward Allah for giving us the trust and energy to perform this assignment which we have chosen as our last year venture. We look for His endowments in each perspective. Without Him we were not able to finish our FYP.

We might want to thank our guardians who made a trust in us to wind up something in life. It's all in light of their requests to God that we have accomplished our objective

We might likewise want to express appreciation to our supervisor, Sir AsifSubhani for furnishing us with fitting rules and points of interest that were important for the finishing of our venture. She was exceptionally kind to us in this stage.

Toward the end we thank every one of our partners and companions who empowered us and helped us to accomplish the objective. They have bolstered us and helped us amid work.

## **Preface**

We researched a lot in different topics to pick something decent enough that can be accepted as a project and is beneficial for others as well. We had been taking unremitting assistance of our advisor and other faculty members. After a timely search, we come up with the idea of introducing a platform of matchmaking in Pakistan where marriage is consider to be as important as living. There are few Matrimonial Websites for Muslims, but they don't seem up to the mark.

So, we decided to build a website in this business that can be attractive and time saving for the busy generation of today's. We keep in mind that our families are very conservative about looking for a life partner, and so we present with the best solution to them by preparing a perfect recipe of demands of the family and desire of the Bride or Groom.

### 1.1 INTRODUCTION

#### 1.1.1 PROJECT DEFINITION

Cars Auction

#### **What is Cars Auction Application?**

Buying a car can be stressful. That's why we decided to reinvent it. We believe that car buying should be transparent and anxiety free. So we partnered with like-minded dealers to address the primary stress point – the negotiation and haggling of price.
