ABSTRACT

This project lies its basis in the exploration of a hidden pearl of nature, in relation to its significance with respect to space ,time and its ethnicity, with an intent to seek equilibrium between the existing natural structure and architectural development for the benefits of Nation and its people.

The project will comprise of a lakeside destination resort development with amenities of public interest and temporary accommodation. Watersides and landforms always inspire people to rejoice themselves by taking a break from their daily work routines or long term vacations. Thus my concern here is to create a recreational hub at a natural site adjacent to **Simli Lake** in **Islamabad** encompassing the ecological treasure of green mountains.
